

VPN Windows 11

Apatinėje užduočių juostoje dešiniu pelės klavišu spauskite ant tinklo ikonos ir pasirinkite „Network and Internet settings“:

Atsiradusiame lange pasirinkite „VPN“:

Tuomet paspauskite „Add VPN“:

Atsidariusiame lange suveskite paveiksle pavaizduotus duomenis (prisijungimo vardas be @go.kauko.lt galūnės) ir paspauskite „Save“:

The image shows a Windows 'Add a VPN connection' dialog box. The background is a blurred view of the Windows Settings app, specifically the 'Network & internet > VPN' section. The dialog box is white with a light gray border and contains the following fields:

- VPN provider:** A dropdown menu with 'Windows (built-in)' selected.
- Connection name:** A text input field containing 'kauko'.
- Server name or address:** A text input field containing 'vpn.kauko.lt'.
- VPN type:** A dropdown menu with 'Automatic' selected.
- Type of sign-in info:** A dropdown menu with 'Username and password' selected.
- Username (optional):** A text input field containing 'prisijungimo vardas'.
- Password (optional):** A password input field with 15 dots and a visibility icon.

At the bottom of the dialog box, there are two buttons: 'Save' and 'Cancel'. The 'Save' button is highlighted with a white background and a black border. Two black arrows with white numbers are pointing to the 'Save' button (labeled '2') and the 'VPN type' dropdown (labeled '1').

Lange turėjo atsirasti pasirinkimas „kauko“, paspauskite „Connect“. Jei duomenys suvesti teisingai matysite „kauko Connected“.
