

STUDENTS' OF THE RADIOLOGY STUDY PROGRAMME SURVEY ON THE QUALITY OF THE CONTENT AND TEACHING OF STUDY COURSES

SPRING SEMESTER OF 2021/2022

TIME: Study courses of the Radiology study program taken in the spring semester of 2021/2022 could be evaluated after receiving the final evaluation of the course until 2022 September 1

AIM: To determine students' of the Radiology study program opinion on the quality of the content and teaching of study courses

TARGET GROUP: Students of the Radiology study program who completed the studies of course units and were evaluated in the spring semester of 2021/2022.

SUBJECT OF THE RESEARCH: The quality of the content and teaching of the study courses of the Radiology study program in the spring semester of 2021/2022.

RESEARCH METHOD: Questionnaire survey (quantitative and qualitative empirical data were collected). The survey was carried out in the virtual environment, Study Management System. Data were processed using Microsoft Excel and SPSS programs. Participation in the survey was voluntary, confidential, and anonymous. Students evaluated the quality of the content on a five-point scale according to the statements formulated (1 - strongly disagree, 5 - strongly agree).

RESULTS: The Study Management System received the fully filled questionnaires of 70 students of the Radiology study program. According to the results of the research, the quality of the content of the courses of the Radiology study program is rated very well by the students (4.6 points out of 5). The respondents mostly agreed with the statements: „The materials and learning resources helped me acquire new knowledge and skills“ – 4.73 points; „The criteria for assessing knowledge and skills were clear and understandable“ – 4.71 points; „The assessment tasks allowed me to demonstrate the knowledge and skills acquired while studying the course“ – 4.67 points. Fewer respondents agree with the statements: „The theory is based on practical examples“ – 4.51 points; „The self-study was useful“ – 4.31 points (see Figure 1).

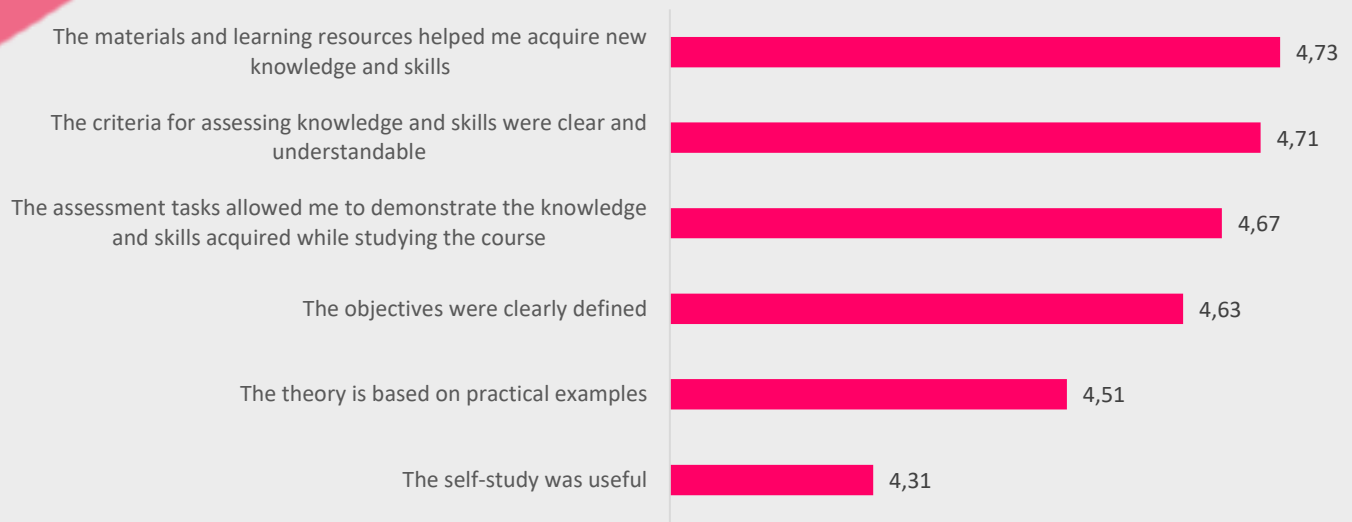

Figure 1: Evaluation of the quality of the content of the course units taught in the study programme of Radiology according to the criteria (averages)

Note: Likert scale average reported.
The higher the average, the more respondents agree with the given statement.
