

STUDENTS' OF THE ORAL HYGIENE STUDY PROGRAMME SURVEY RESULTS ON THE QUALITY OF THE CONTENT AND TEACHING OF STUDY COURSES

SPRING SEMESTER OF 2023-2024

FACULTY OF MEDICINE

TIME: Study courses taken in the spring semester of 2023 – 2024 academic year could be evaluated after receiving the final evaluation of the course until June 30th, 2024.

AIM: to determine students' opinion on the quality of the content and teaching of study courses.

TARGET GROUP: all students of the Oral Hygiene study programme who completed the studies of course units and were evaluated in the spring semester of 2023 – 2024.

OBJECT OF THE RESEARCH: all course units taught in the spring semester of 2023 – 2024 which had not been evaluated yet.

RESEARCH METHOD: questionnaire survey (quantitative and qualitative empirical data were collected). The survey was carried out in the virtual environment – Study Management System. Data were processed using „Microsoft Excel“ and SPSS software. Participation in the survey was voluntary, confidential and anonymous. Students evaluated the quality of the course content and teaching according to the statements formulated on a five-point scale (1 – strongly disagree, 5 – strongly agree). Students of the Oral Hygiene study programme assessed the quality of the course content according to 6 criteria and the quality of teaching according to 8 criteria, in total 14 criteria.

RESULTS: 18 questionnaires were received in the Study Management System. Summarizing the obtained results, it can be said that the quality of the content of Oral Hygiene study programme subjects is rated very high (averages are more than 4 points out of 5). Most respondents agree with statements that the subject helped to acquire new knowledge and skills (4,91), that theory is based on practical examples (4,91), that self-study was useful (4,82) (see Figure 1).

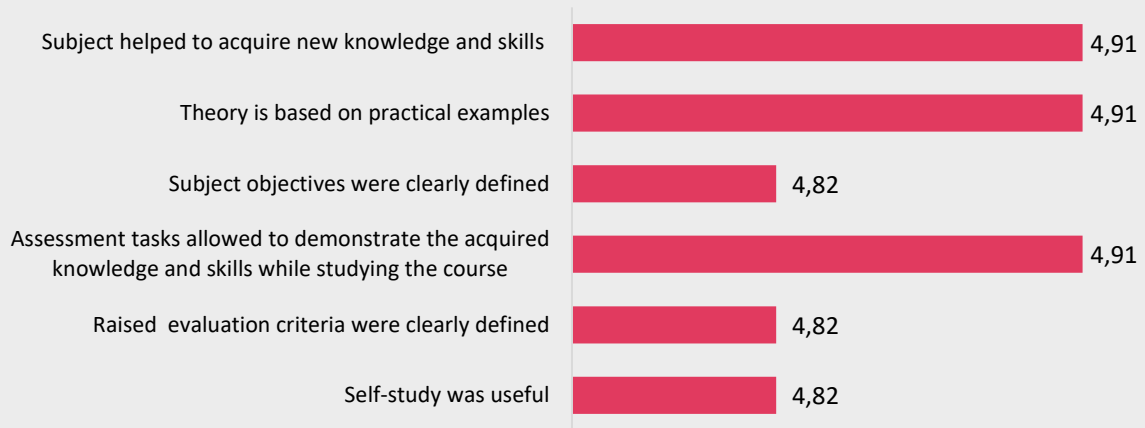

Figure 1. Evaluation of the content quality of the course units taught in the Oral Hygiene study programme according to the criteria (averages).

*Note: „Likert“ scale average is presented.
The higher the average, the more respondents agree with the statements+*

According to all criteria the teaching quality of subjects of the Oral Hygiene study programme is rated very high (averages are more than 4 points out of 5) (see Figure 2). Respondents mostly agree with the statements that the lecturer communicated with students respectfully and ethically (4,94) and that the lecturer provided feedback (4,94) and teaching/learning resources were available on Moodle (4,94). The respondents agree with the statements that the lecturer’s consultations were useful and timely (4,94), teaching was coherent and clear (4,83), lecturer worked according to the time table (4,89).
